The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

a) Basis of Preparation

The financial statement of the company have been prepared in accordance with Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended and relevant provisions of the Companies Act, 2013 ("The Act")

Historical cost convention

The financial statements have been prepared under the historical cost convention, as modified by the following :

Certain financial assets and financial liabilities at fair value

b) Property, Plant and equipment :-

All other items of property, plant and equipment are stated at historical cost which includes capitalised borrowing cost less depreciation and impairment loss, if any. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the assets carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Expenditure incurred on assets which are not ready for their intended use comprising direct cost, related incidental expenses and attributable borrowing cost are disclosed under Capital Work in Progress

Depreciation method :

Depreciation is provided to the extent of depreciable amount on straight Line Method (SLM) based on useful life.

c) Investments and other financial assets

those to be measured subsequently at fair value through profit or loss

those measured at amortised cost

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of reporting period. The discount rate used to determine the present value is pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expenses.

Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Company.
