**Reliance Chittagong Power Company Limited**  
**Notes to the financial statements for the year ended March 31, 2022**

**1. General Information :**

Reliance Chittagong Power Company Limited incorporated in Bangladesh and a Group Company of Reliance Power Limited.

**2. Significant Accounting Policies :**

**Basis of preparation, measurement and significant accounting policies**

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

**a) Basis of Preparation**

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended, and relevant provisions of the Companies Act, 2013 ("The Act")

**Historical cost convention**

The financial statements have been prepared under the historical cost convention, as modified by the following :

Certain financial assets and financial liabilities at fair value

**b) Investments and other financial assets**

**Classification**

The Company classifies its financial assets in the following measurement category :

- those to be measured subsequently at fair value through profit or loss
- those measured at amortised cost

**Contributed equity :**

Equity shares are classified as equity, incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net off tax, from the proceeds.

**c) Provisions and Contingent Liabilities/Assets**

**Provisions:**

Provisions are recognised when there is present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of reporting period. The discount rate used to determine the present value is pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expenses.

**Contingent liabilities**

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Company. A present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or reliable estimate of the amount cannot be made, is termed as contingent liability

**Contingent Assets**

A contingent asset is disclosed, where an inflow of economic benefits is probable.

**d) Revenue :**

Revenue is measured at the fair value of the consideration received or receivable.

**e) Cash and Cash equivalents :**

Cash and cash equivalents includes cash on hand, demand deposits with banks, short-term balances (with an original maturity of three months or less from date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of change in value.
