POWER PLANT AND COAL MINE PERFORMANCE BEST AMONG PEERS
DELIVERING BEST-IN-CLASS AVAILABILITY AND RECORD PLF ~ 100%**

ONLY 4000 MW PLANT OPERATING AT OVER 100% PLF IN INDIA

Sasan (Madhya Pradesh), 11 January 2016:

Central Electricity Regulatory Commission (CERC) has approved Change in Law during Operations petition filed by Sasan Power Limited.

The order allows it to claim increase in electricity duty rate and energy development cess on sale of power to the State of Madhya Pradesh and on auxiliary power consumption.

CERC's order clearly establishes the principles of Change in Law in line with the terms of the Power Purchase Agreement between Sasan Power Limited and Procurers, which will also ease pass-through of future Change in Law impacts on Sasan UMPP.

One time compensation of Rs. 271 Crore is granted by regulatory commission till 31st July 2015.

Mechanism for future payments towards change in Electricity Duty Rate & Energy Development Cess has also been approved by the regulatory commission in its order, which provides compensation of over Rs. 300 Crore per annum, at full capacity, over 25 years PPA term resulting in effective tariff increase of about 9 paise per unit (7% increase).

The Sasan Ultra Mega Power Project, implemented in Singrauli District of Madhya Pradesh, is the only 4,000 MW plant operating at over 100% PLF in India.

About Reliance Power:

Reliance Power Limited, a part of the Reliance Group, is India's leading private sector power generation and coal resources company. The company has the largest portfolio of power projects in the private sector, based on coal, gas, hydro and renewable energy, with an operating capacity of 5,945 megawatts.
